Lab 7 Websites

Programming for Business Analytics
MG-GY 8401

Agenda

- Accessing Internet Data
- Parsing Data with XPath

- Describe the learning objectives.
- Summarize the relevant take-aways.
- Ask about unclear information.

The European Central Bank is the central bank of the European Union consisting of nineteen member countries using the euro.

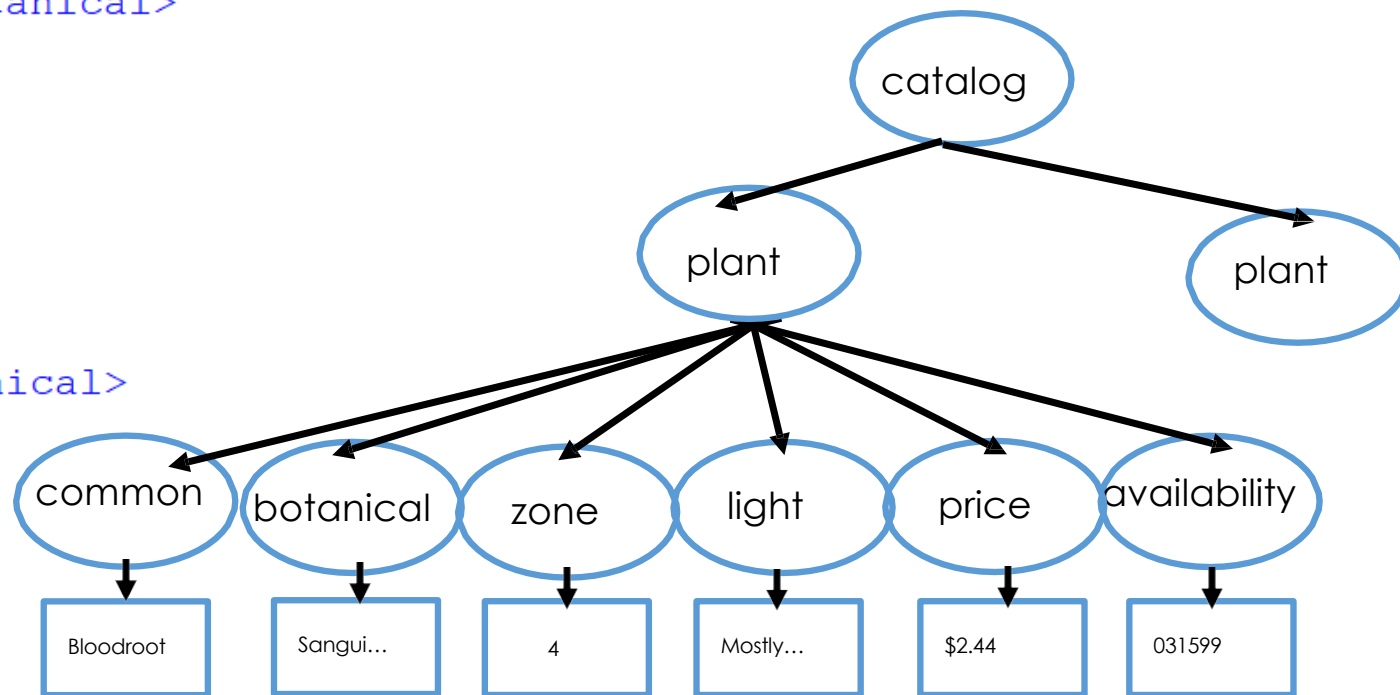

eXtensible Markup Language
is a protocol for formatting
data with a tree-like structure

```
<catalog>
  <plant>
    <common>Bloodroot</common>
    <botanical>Sanguinaria canadensis</botanical>
    <zone>4</zone>
    <light>Mostly Shady</light>
    <price currency="USD">$2.44</price>
    <availability>031599</availability>
  </plant>
  <plant>
    <common>Columbine</common>
    <botanical>Aquilegia canadensis</botanical>
    <zone>3</zone>
    <light>Mostly Shady</light>
    <price currency="USD">$9.37</price>
    <availability>030699</availability>
  </plant>
  <plant>
    <common>Marsh Marigold</common>
    <botanical>Caltha palustris</botanical>
    <zone>4</zone>
    <light>Mostly Sunny</light>
    <price currency="CAD">$6.81</price>
    <availability>051799</availability>
  </plant>
</catalog>
```

Extraction tool designed
for locating content in an
XML file or HTML file

Expressions contain
three components

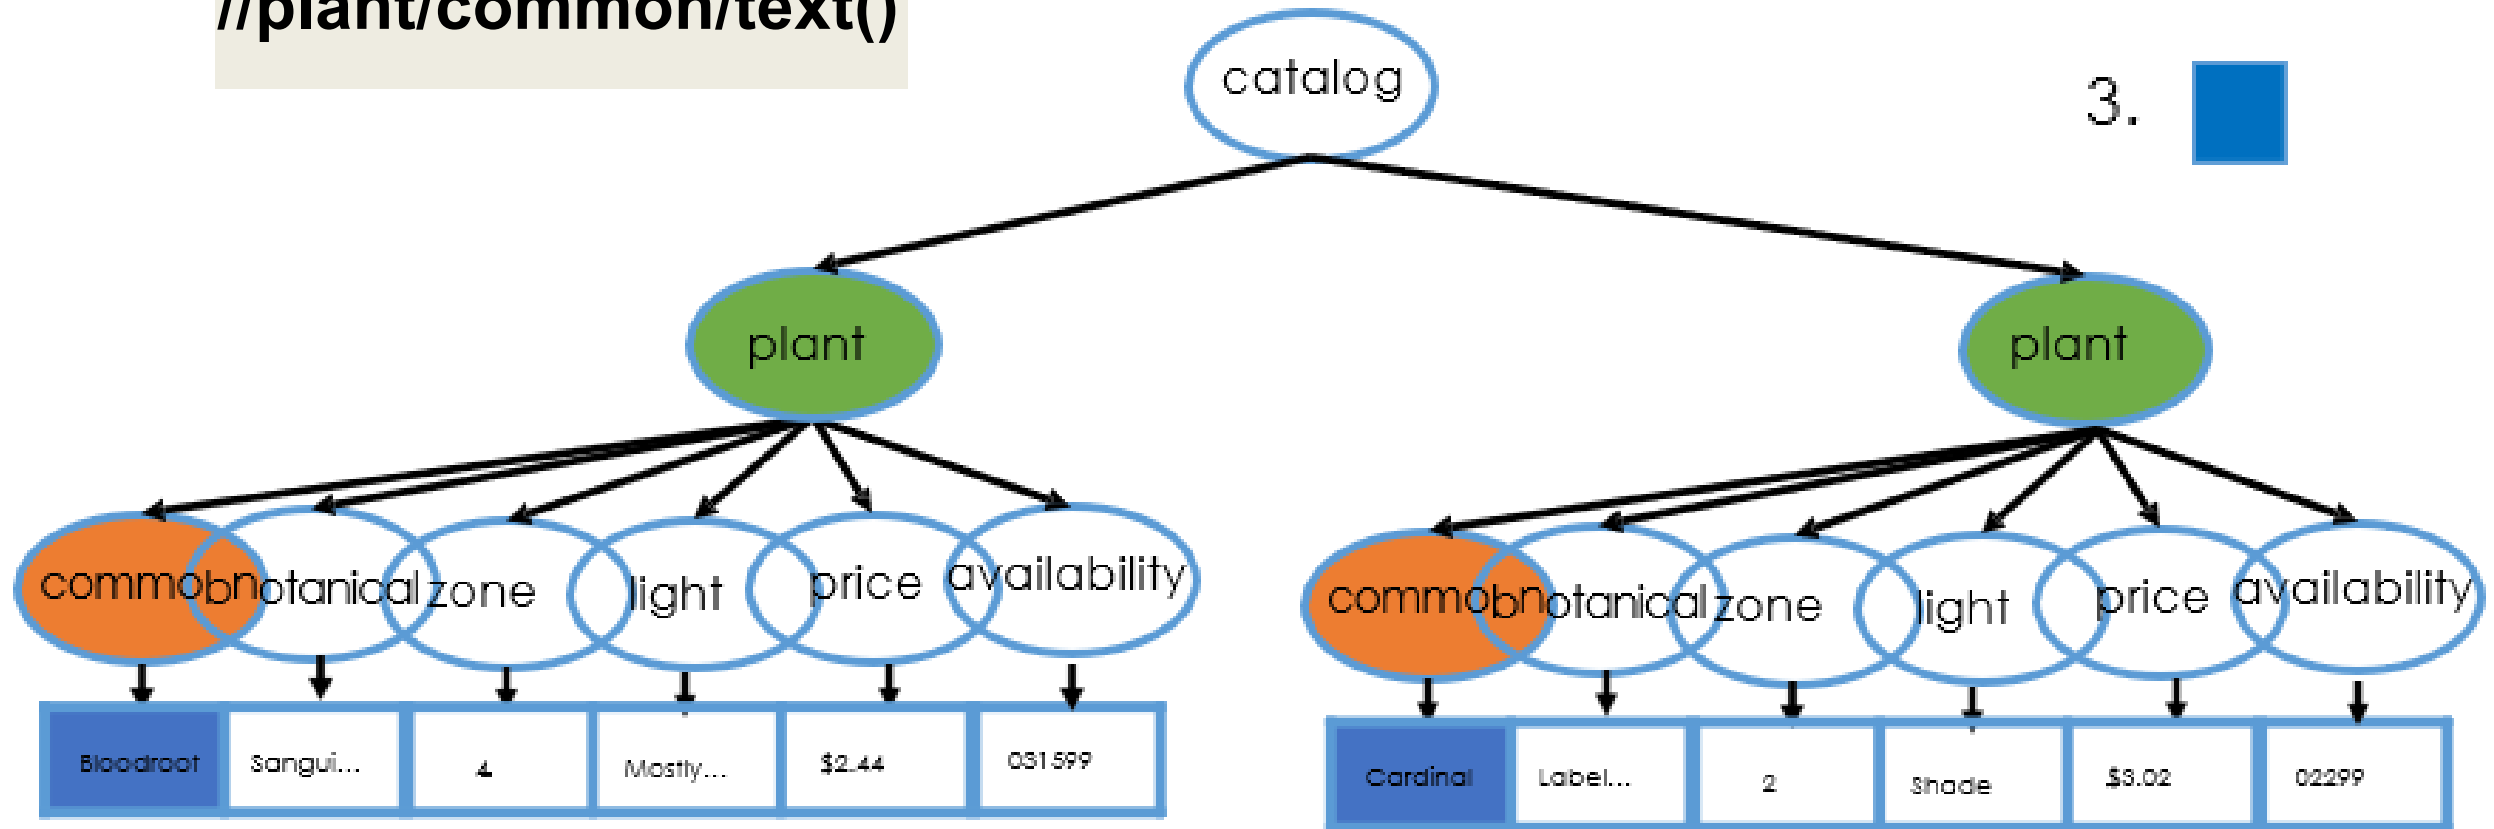

- ▶ Direction
- ▶ Element Information
- ▶ Logical Expression

Retrieve common names of all plants

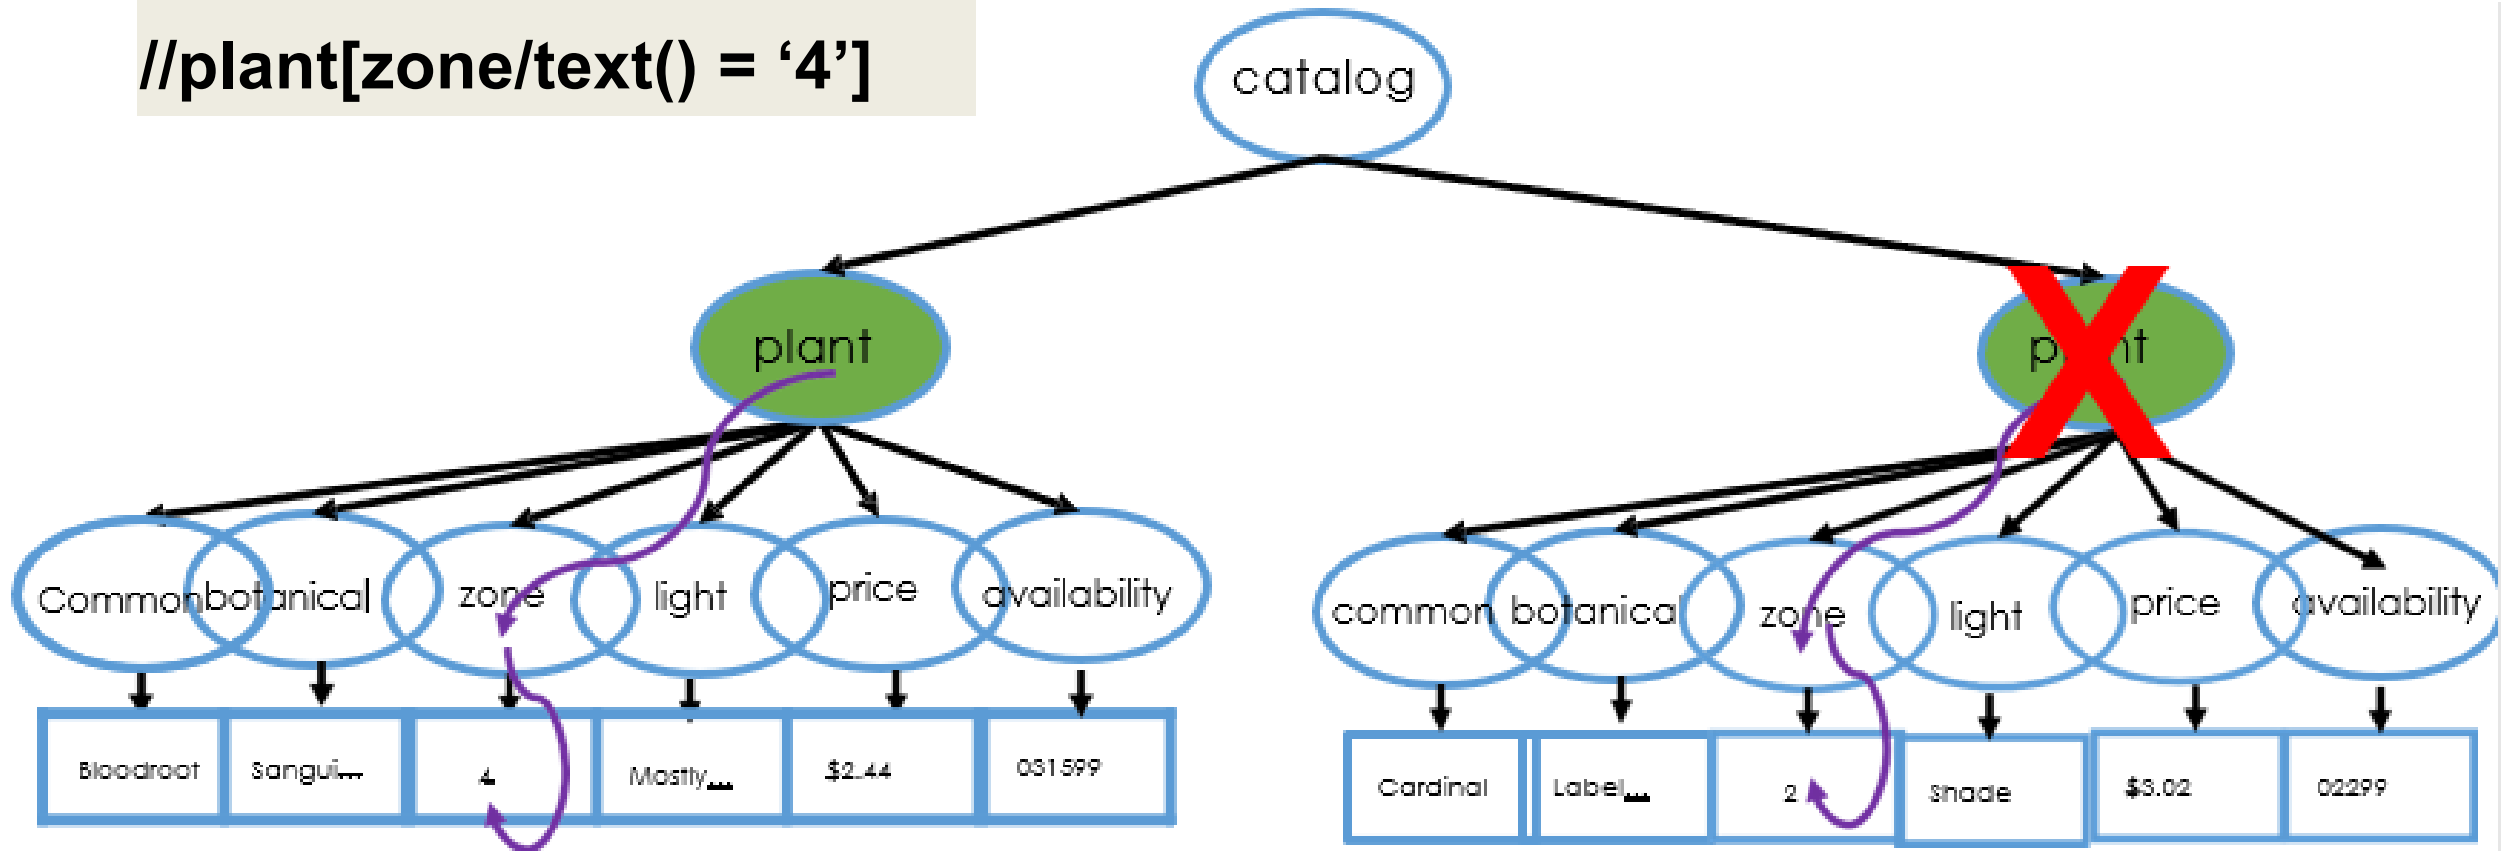

//plant/common/text()

1. 
2. 
3. 

Retrieve plants that grow in zone 4

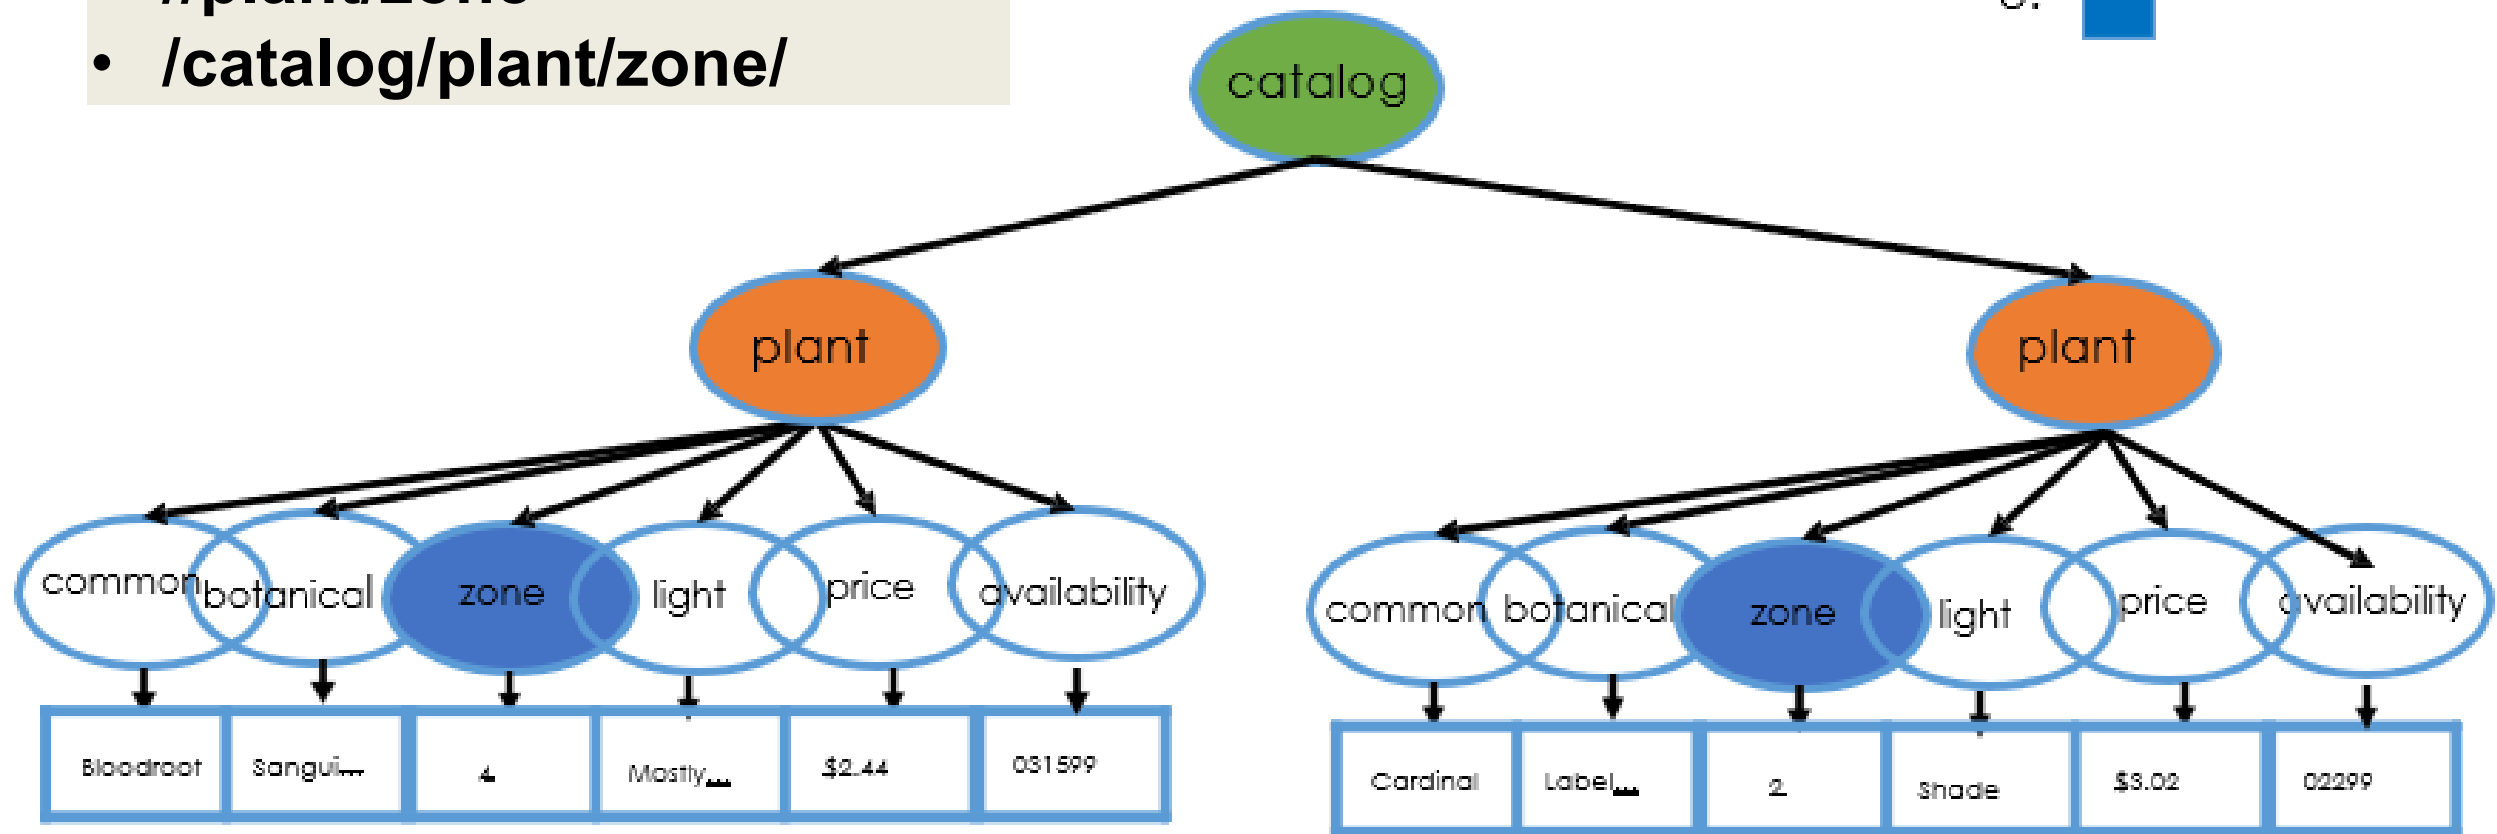

```
//plant[zone/text() = '4']
```

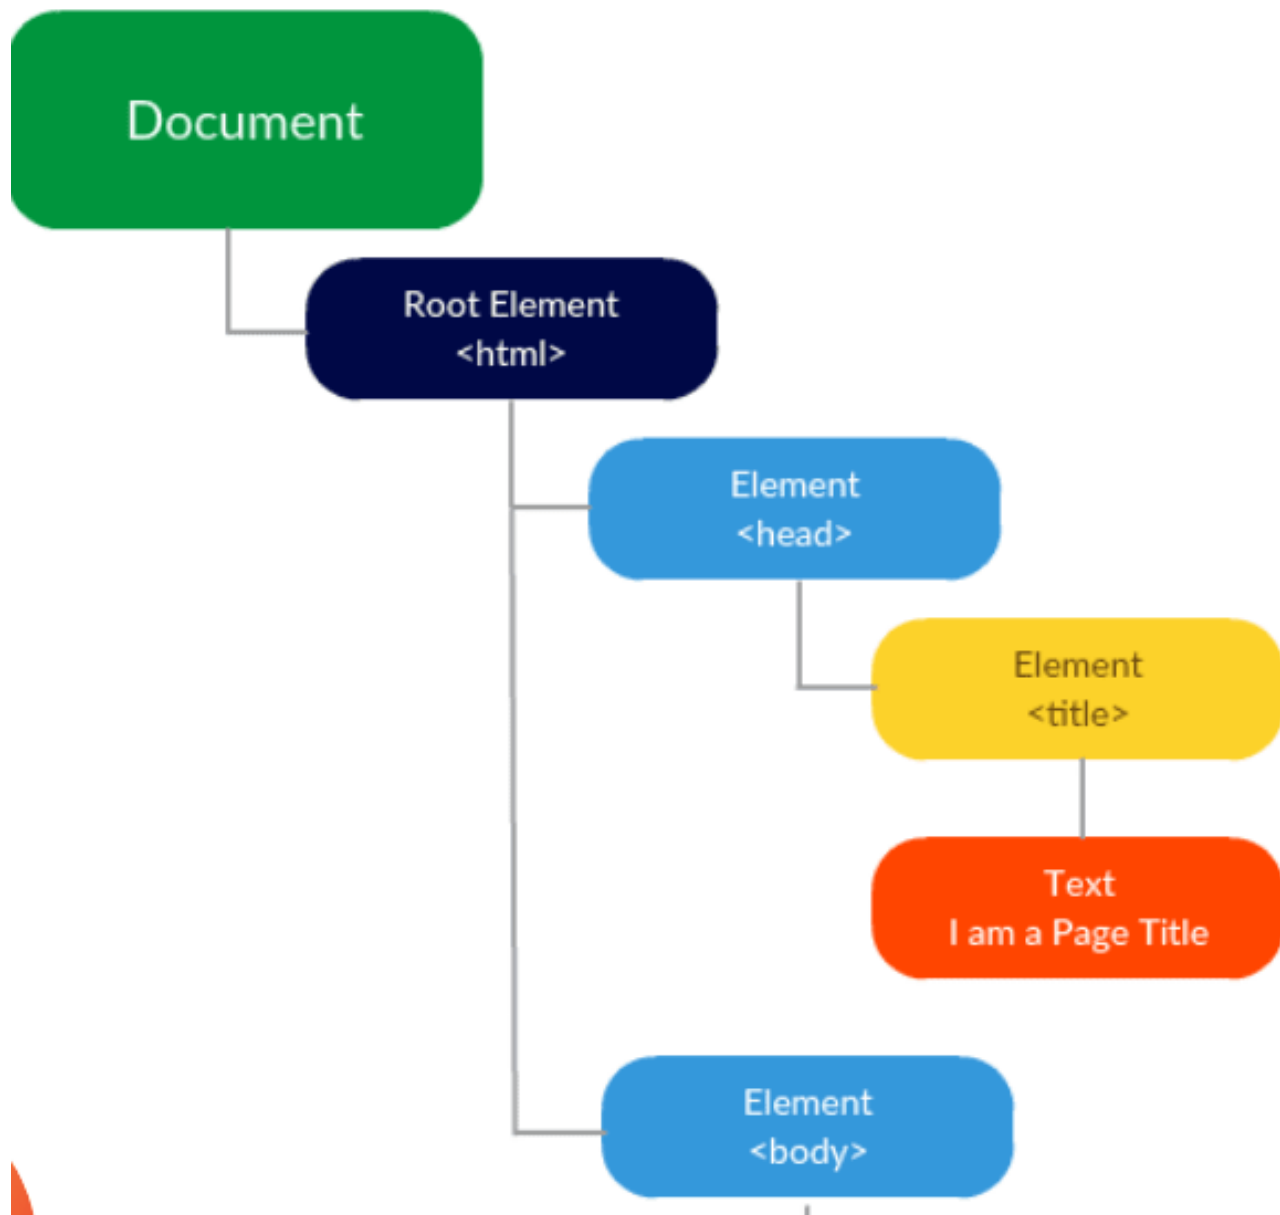

Three ways to access zone

- **//zone**
- **//plant/zone**
- **/catalog/plant/zone/**

1. 
2. 
3. 

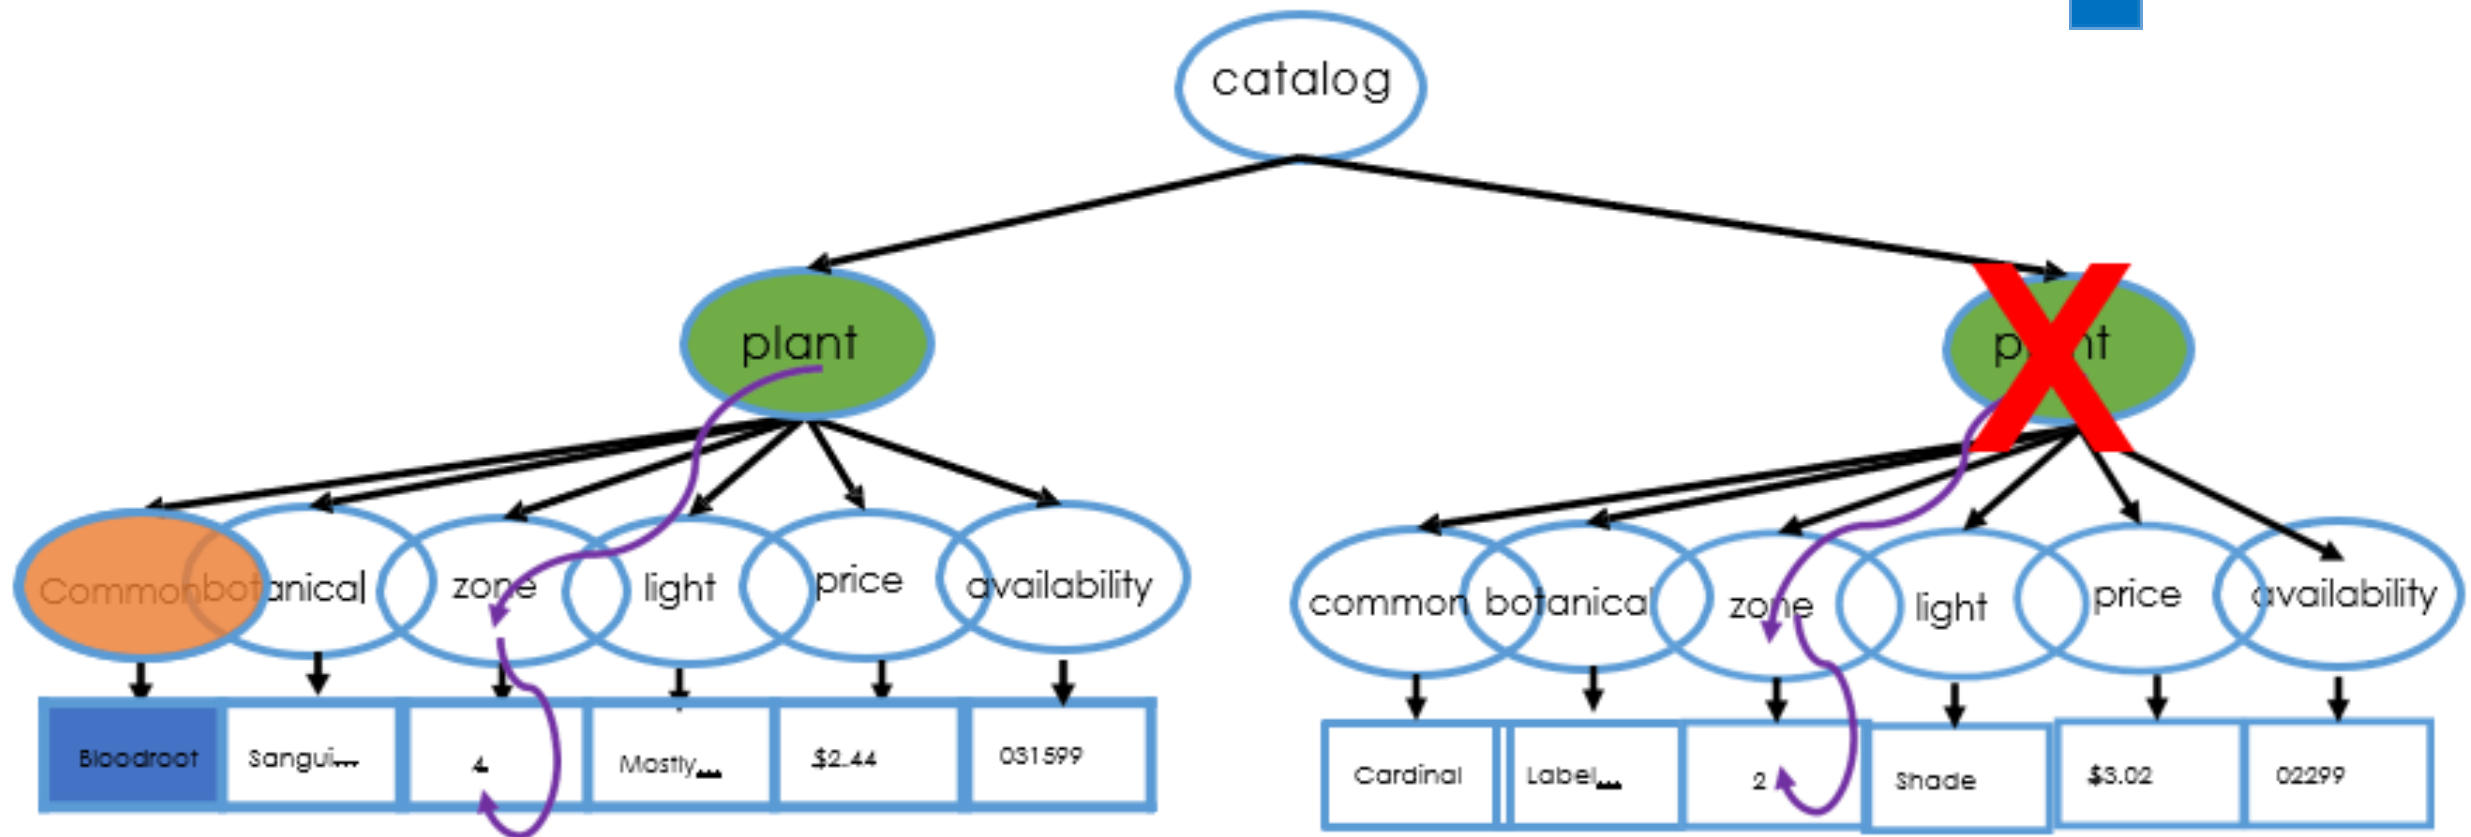

Directions

- ▶ Child /
- ▶ Descendent //
- ▶ Self .
- ▶ Parent ..

Retrieve common names of plants that grow in zone 4

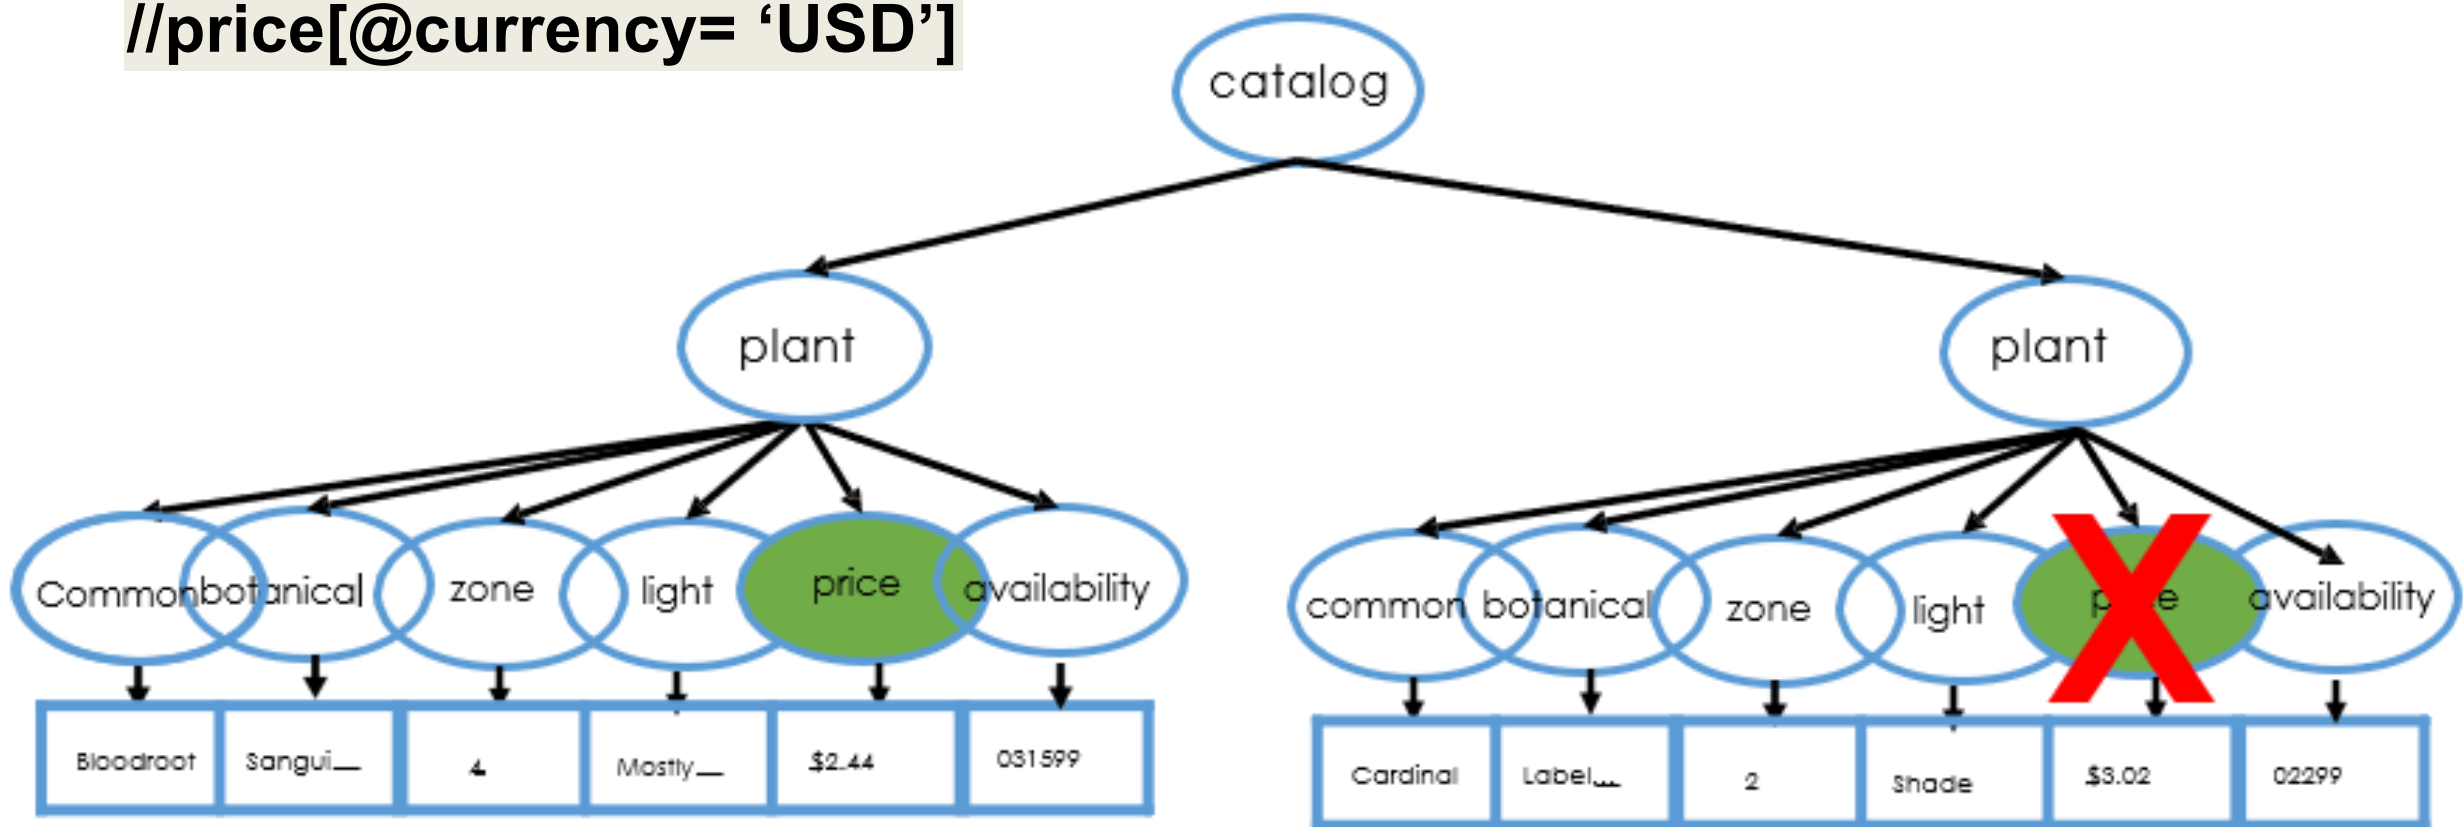

`//common[..zone/text() = '4']/text()`

1.
2.
3.

Retrieve prices of plants whose prices are listed in USD

//price[@currency= 'USD']

What is the result of the following Xpath query?

`//light[../price/text()=' $6.81']/text()`

1. 
2. 
3.
